

Updating Your Operating System and Internet Browser for Security

Our school and our students are growing, and we are so glad you are helping make this possible. To ensure the highest level of security for your online gifts, we updated our online donation pages in March 2018. By doing this, we are staying up to date with the latest industry standards.

Because these security features are not compatible with older systems, we highly recommend that you update both your operating system and internet browser to the most current version. This way, you can ensure that your online donation is protected and processed safely.

If you have any questions, feel free to email us at info@safepassage.org or call (207) 846-1188.
